Bus crash patients treated at AnMed Health

(Anderson, S.C. – Sept. 26, 2016) – Thirteen patients from a bus crash on Interstate 85 were transported to AnMed Health late Monday morning. Three were in critical condition.

The Hospital Incident Command System was partially activated to respond to the high volume of incoming patients. By moving patients who already were in the hospital to other treatment areas, the AnMed Health staff accommodated all of the incoming patients.

Specific information about the patients is not available at this time.
