AnMed Health vaccine distribution update

(Anderson, S.C. – Feb. 16, 2021) - This week we received less than half the vaccine doses needed for scheduled appointments. As a result of the limited supply, we will operate our vaccine clinic at the Civic Center only one day this week and will reschedule some appointments. We will call to notify all patients who are affected. As a reminder, the CDC recommends that patients receive their second dose of the Pfizer vaccine within 21 to 42 days of their first dose. However, if the second dose is delayed beyond 42 days, it is not necessary to restart the series.

Due to a very limited vaccine supply, AnMed Health is not scheduling any new appointments at this time. As directed by SC DHEC, we are prioritizing the vaccine we receive each week for those scheduled for a second dose. We understand that many eligible patients in the Anderson area are anxious to get the vaccine.

We are committed to vaccinating our community as quickly as we receive the vaccine supply to do so. We appreciate your patience and understanding.
